Amir Lajevardi

Location: United Kingdom, London | **LinkedIn:** https://www.linkedin.com/in/a-lajevardi-169b162b6/ | **Email:** Amir.lajevardi@city.ac.uk | **Phone:** +44 7376 129141

Education

City, University of London – London, UK

BEng Computer Science | Oct 2024 – Jun 2027

Key Modules:

- Introduction to Algorithms
- Mathematics for Computing
- Systems Architecture
- Programming in Java
- Operating Systems
- Computer Science, Ethics & Society
- Databases

Coursework Highlights:

- Developed a 2D game using the university's custom engine based on the JBOX2D engine (a java physics engine).
- Designed and implemented relational databases using Visual Paradigm and MySQL.
- Built and analyzed algorithms in Java for processing integer arrays, focusing on time complexity and efficiency.

Experience & Extracurricular Activities

Encode AI Hackathon – London

Participant – Project manager and UI Developer

- Collaborated with a team to build, an AI-powered assistant designed to simplify medical record-keeping and patient interaction for healthcare professionals
- Developed core features using the Portia SDK, integrating AI workflows and prompt chains to handle natural language interactions
- Used tools and technologies such as Node.js, JavaScript, HTML/CSS, and GitHub for fast and effective development
- Gained experience in AI agent design, team collaboration under time pressure, and rapid prototyping with unfamiliar tools

iOS Development Projects (*Self-Taught Swift*)

- Built several iOS applications using Swift and Swift UI, following the MVVM architecture to maintain clean code separation
- Designed intuitive and responsive user interfaces, focusing on usability and smooth UI
- Developed features such as form inputs, navigation flows, and local data handling
- Gained hands-on experience with Xcode, Combine framework, and Swift data structures

Private Tutor – London

Math and Physics Tutor

- Tutored GCSE and A-Level students in Mathematics and Physics across various topics
- Focused on exam preparation and strengthening problem-solving skills through targeted practice

Skills

- Programming Languages: Java, Swift, Python, SQL
- Concepts: Object-Oriented Programming, Algorithms, Databases, Operating Systems, version control (Git/GitHub)

Languages

Persian, English
